

A calendar-based SAP UI5 app on SAP BTP for simple, real-time timesheet booking.

Challenge

In SAP S4HANA, standard timesheet application provides limited visibility and a rigid week-based interface, making time entry repetitive and time-consuming.

Solution

A custom SAP UI5 application on SAP BTP provides a simple calendar-based interface for timesheet management. It enables real-time SAP integration, secure user access, and faster time booking.

Key Features

- Calendar-based timesheet booking
- Day, Week, Work Week & Month views
- Real-time SAP integration
- Week-wise & Month-wise hour summaries
- Secure role-based user access

Integration & API

- SAP S/4HANA Workforce Timesheet OData APIs
- Custom CDS Views & OData Services
- SAP Build Work Zone
- SAP BTP (Business Application Studio)
- Cloud Foundry

Target Industry : Professional Services, IT Services
