SAP BTP Accelerator: UAE Peppol e-Invoicing Integration

Automated UAE e-Invoicing between SAP S/4HANA Cloud and the Peppol network

Challenge

UAE e-Invoicing requires invoices to be exchanged over the Peppol network through compatible service providers. Manual submission, supplier invoice retrieval and status follow-up increase effort, and SAP DRC may be too costly for focused needs.

Solution

A reusable SAP S/4HANA Cloud and SAP BTP accelerator with three custom apps (OAuth Configuration, Billing Document, Supplier Invoice) automates Peppol invoice submission and receiving via Infinite, extensible to other service providers.

Key Features

- Automated billing document submission to Peppol
- Supplier invoice retrieval and processing
- Submission, acknowledgement & error tracking
- Pluggable service provider & Ready to Deploy accelerator

Business Value

- Minimizes manual invoice submission, supplier invoice handling, and repeated status follow-ups.
- Provides an alternative for organizations seeking Peppol connectivity without adopting the SAP DRC solution for this specific requirement.

Target Industry : Organizations in the UAE using SAP ERP systems that require e-Invoicing connectivity to the Peppol network through compatible service providers.
